

ARMLEY SCHULZE 32 Stop HAUPTWERK™ version 5+ SAMPLE SET SINGLE-CHANNEL SET DOWNLOAD INSTRUCTIONS

Please note: this set is fully compatible with all versions of Hauptwerk from version 5 onwards.

Whilst downloading the Armley component packages, it is recommended that you view the user manual for information on installation and loading. The user manual for the 32 stop sample set may be downloaded using the following link ...

www.lavenderaudio.co.uk/armley/armley32.pdf

There are a number of files that need to be downloaded for this set to load. Please read and follow these instructions carefully and bear in mind that some file sizes are very large and could take some hours to download. It is probably worth using an FTP client such as Filezilla as some browsers struggle with file sizes above a certain amount. A useful tutorial on the operation of Filezilla may be found at [http://wiki.filezilla-project.org/FileZilla_Client_Tutorial_\(en\)](http://wiki.filezilla-project.org/FileZilla_Client_Tutorial_(en)).

If you decide not to use FTP, then either simply click on the first download link (if your version of Adobe PDF reader supports this) or copy and paste the link into your internet browser. Downloading should commence straight away and you should choose to save the file to a suitable location on your hard drive. When the first file has completed downloading, repeat the process for all other files.

For FTP use, note that username and password information is case sensitive – and, as the difference between (for example) a number 1 and a lower case L can be difficult or impossible to tell, copy and paste may be easiest.

Finally, if you have already downloaded and installed the single-channel Evaluation sample set, then you won't need to download Data Package 981, as this will already be installed on your computer.

SINGLE CHANNEL SAMPLE SET – Total download size is approximately 8.1 GB

For these downloads, there is no username or password.

Data Package 981

https://www.lavenderaudio.co.uk/hw-v-downloads/armley-volume1-single/Armley-DataPackage-981.CompPkg_Hauptwerk.rar
3,120,379,198 bytes - MD5 checksum is 4ae9061c96421ebc673c0208f23ebe21

Data Package 984

https://www.lavenderaudio.co.uk/hw-v-downloads/armley-volume1-single/Armley-DataPackage-984.CompPkg_Hauptwerk.rar
1,277,778,557 bytes - MD5 checksum is 6a7489230d7cb53e7a2c1d5f63abbae7

Data Package 987

https://www.lavenderaudio.co.uk/hw-v-downloads/armley-volume1-single/Armley-DataPackage-987.CompPkg_Hauptwerk.rar
4,310,894,714 bytes - MD5 checksum is 1c29dc169c89365ba0dbc4f28a04d06b

Armley 32 stop organ (includes enhanced organ definition)

https://www.lavenderaudio.co.uk/hw-v-downloads/armley-volume1-single/Armley-32Single-OrganPackage.CompPkg_Hauptwerk.rar
342,942 bytes - MD5 checksum is 89985907fac155d80eafbfe2d1bd2dd6

The FTP details for the single-channel downloads are (all are in the same folder) ...
