HAVERHILL OIC HAUPTWERK™ version 5 SAMPLE SET
FULL SET DOWNLOAD INSTRUCTIONS

Please note: this set is fully compatible with all versions of Hauptwerk from version 5 onwards.

Whilst downloading the Haverhill component packages, it is recommended that you view the user manual for information on installation and loading. The user manual for this sample set may be downloaded using the following link ...

http://www.lavenderaudio.co.uk/oic/usermanualfull.pdf

There are three files that need to be downloaded and installed in Hauptwerk for the Haverhill OIC Full sample set to load successfully.

Please read and follow these instructions carefully and bear in mind that some file sizes are very large and could take some hours to download. It is probably worth using an FTP client such as Filezilla as some browsers struggle with file sizes above a certain amount. A useful tutorial on the operation of Filezilla may be found at http://wiki.filezilla-project.org/FileZilla_Client_Tutorial_(en). Note that the installer for Filezilla will probably offer to install additional software which may be unwanted; please review the installation choices carefully and un-tick the appropriate checkboxes as necessary.

If you decide not to use FTP, then either simply click on the first download link (if your version of Adobe PDF reader supports this) or copy and paste the link into your internet browser. You should then be asked to confirm that you wish to download this file and - if prompted - choose to save the file to a suitable location on your hard drive. When the first file has completed downloading, repeat the process for the other file.

The FTP username and password information is case sensitive – and, as the difference between (for example) a number 1 and a lower case L can be difficult or impossible to tell, copy and paste may be easiest.

HAVERHILL OIC FULL SAMPLE SET – total download size is approximately 4.3 GB

These files are not password protected

Data Package 1
https://www.lavenderaudio.co.uk/hw-v-downloads/oic-full/Haverhill-DataPackage-674.CompPkg_Hauptwerk_rar
1,474,189,350 bytes - MD5 checksum is ede810d133cb62ac30bdf2b81dfc1b80

Data Package 2
https://www.lavenderaudio.co.uk/hw-v-downloads/oic-full/Haverhill-DataPackage-675.CompPkg_Hauptwerk_rar
