HEREFORD CATHEDRAL 23 Stop HAUPTWERK™ version 5+ SAMPLE SET
DOWNLOAD INSTRUCTIONS

Please note: these sets are fully compatible with all versions of Hauptwerk from version 5 onwards.

This sample set has been provided on a shareware basis. This means that the set is free to download, install and use for an unlimited period of time - no iLOK licence activation is necessary for the set to load. However, the concept of shareware means that a payment should be made if you decide to keep using the sample set after an evaluation period of 30 days. The suggested payment is £120 and a purchasing link is provided for this amount on the Lavender Audio Order page. However, should you wish to make a payment of a different amount, please contact Lavender Audio via email or by using the Contact webpage.

~~~~~~~~~~~~~~~~~~~~~~~~~~~~

Whilst downloading the Hereford component packages, it is recommended that you view the user manual for information on installation and loading. The user manual for the 23 stop sample set may be downloaded using the following link ...

www.lavenderaudio.co.uk/hereford/hereford23.pdf

There are a number of files that need to be downloaded for this set to load. Please read and follow these instructions carefully and bear in mind that some file sizes are very large and could take some hours to download. It is probably worth using an FTP client such as Filezilla as some browsers struggle with file sizes above a certain amount. A useful tutorial on the operation of Filezilla may be found at http://wiki.filezilla-project.org/FileZilla_Client_Tutorial_(en). Note that the installer for Filezilla will probably offer to install additional software which may be unwanted; please review the installation choices carefully and un-tick the appropriate checkboxes as necessary.

If you decide not to use FTP, then either simply click on the first download link (if your version of Adobe PDF reader supports this) or copy and paste the link into your internet browser. Downloading should commence straight away and you should choose to save the file to a suitable location on your hard drive. When the first file has completed downloading, repeat the process for all other files.

For FTP use, note that username and password information is case sensitive – and, as the difference between (for example) a number 1 and a lower case L can be difficult or impossible to tell, copy and paste may be easiest.

Finally, if you have already downloaded and installed the Evaluation sample set, then you won't need to download Data Package 1, as this will already be installed on your computer.

Total download size is approximately 4.5 GB

For all of the direct download links, there is no username or password.

Data Package 1
https://www.lavenderaudio.co.uk/hw-v-downloads/hereford-volume1/HerefordCathedral-DataPackage1.CompPkg_Hauptwerk_rar
2,125,439,409 bytes - MD5 checksum is 61ef9709cc4323d6d05ba6f69c44eb01

Data Package 2
https://www.lavenderaudio.co.uk/hw-v-downloads/hereford-volume1/HerefordCathedral-DataPackage2.CompPkg_Hauptwerk_rar
2,676,633,081 bytes - MD5 checksum is 87474cb8578b42e690fe7475e314d6b0

Hereford 23 stop organ
https://www.lavenderaudio.co.uk/hw-v-downloads/hereford-volume1/Hereford-23-Stop-Organ.CompPkg_Hauptwerk_rar
106,121 bytes - MD5 checksum is d9c1cfa0d47af21cd491e751a4d2026a

The FTP details for these first three downloads (they are all in the same folder) are ...
